1 INTRODUCTION

Adult entertainment is an industry as old as time. It is estimated that the net worth of the entire industry is as large as \$100 billion.

FACT FANS SPENT \$390 MILLION ON ONLYFANS IN 2020

Platforms such as Chaturbate and OnlyFans have demonstrated the extraordinary popularity of adult content over the internet.

**CRYPTO
IS/THE
FUTURE**

2021 was also the year for cryptocurrency. The space has gained remarkable momentum since the technology materialized with the founding of Bitcoin in 2009. Today, the technology built on distributed networks is no longer just a concept. Its practical applications have started to disrupt enormous industries, especially the world of finance.

Built on permission-less blockchains with open protocols and open standards, Web 3.0 will continue to democratize the internet. This will allow for a much greater level of freedom, decentralization, and democracy for individual users, content creators, and projects.

ADULT/CONTENT CRYPTOCURRENCY

The marriage of adult content and cryptocurrency is natural. Consumers of adult content will benefit from the anonymity and flexibility of crypto; and creators will benefit from the decentralization and instant payments.

ENTER CUMINU TOKEN

CUMINU was created to improve the efficiency of transactions between creators and fans. Similar to the goal of distributed networks, CUMINU aims to reduce the need for intermediaries in such transactions. Both creators and consumers of adult content will benefit from a far greater level of freedom with which their interactions can take place.

FACT ONLYFANS BANS PORN IN OCTOBER 2021

It was created to take advantage of the changing technology and the growing disillusion of creators on OnlyFans as the company pivots their brand to a more Safe-for-Work (SFW) social platform.

It was created to liberate consumers from the inefficiencies from the irreversible process of buying digital tokens on traditional adult-content streaming platforms. When you buy tokens on a site like Chaturbate, you are making an ex ante decision on how much you intend to spend on its content. Consumers rarely have perfect information on how much they can (or are willing to) spend before one of two things occur—

- a. They find a different platform with better content;
- b. They become temporarily uninterested in adult-content altogether.

In both cases, depending on how well one was able to predict their future token expenditure, one would have spent more money than what would have been optimal.

cummuniti reduces these inefficiencies dramatically as it provides users with the flexibility of swapping in and out of the ecosystem whenever they please. This will benefit the platform

because consumers will feel a greater degree of confidence to buy more tokens than they need, without being left with tokens you are forced to then use or abandon.

A BRIEF HISTORY OF CUMINU TOKEN

MAY 2021

TOKEN LAUNCH

In May 2021, CUMINU token was conceived on the Ethereum blockchain with the aim of becoming the world's leading provider of paid adult content over the internet.

JUL 2021

V1 PLATFORM BETA

In July 2021, the first public beta of the first version of the platform, codenamed "V1" was held. Hundreds of CUMINU investors participated in successful rounds of live streams hosted by our celebrity ambassadors.

AUG 2021

cummuniti DEVELOPMENT

ECOSYSTEM REBRAND

In August 2021, the development of the second-generation of the platform begun. This was codenamed V2. The CUMINU ecosystem went through a rebrand, and the V2 has been named "**cummuniti**."

CUMINU's mission is to create a truly unique adult-content platform, powered entirely by cryptocurrency. CUMINU will differentiate itself from competitors by offering lower fees for models, a next-generation platform, and superior ways by which fans can interact with their favorite adult-content creators.

MAIN FEATURES

cummuniti aims to offer three (3) main features.

1 LIVE STREAMING

Our tried-and-tested livestream feature will enable interactions between viewers and streamers in real time. We have successfully implemented this feature on our V1 platform where hundreds of viewers were able to participate in the livestream of creators like Tasha Reign, Kim Swallows, Lacey London, and Yvonne Bar.

2 DIGITAL CONTENT

The **cummuniti** platform will also feature a marketplace of digital and physical content. Users of the platform will get to buy videos, photos, and merchandise sold by creators. Non-Fungible Tokens (NFT) will also be supported on the **cummuniti** platform.

3 ASK ME ANYTHING

Adult stars will regularly host live AMA sessions during community events. Fans can interact with their favorite adult stars in real time via live chat. Tipping and auctions will be fully supported.

2 VALUES

COMMUNITY

A large part of community development revolves around two major values—inclusivity and collaboration. Every aspect of the CUMINU project, including development, marketing, and decisions, are driven directly by the community. Our motto is **one team, one dream**. We try to live and breathe that motto.

LONGEVITY

CUMINU is not a meme token, nor are we a pump-and-dump scheme. The liquidity for CUMINU has been locked for two (2) years with UniSwap. We have a dedicated team of people who work tirelessly around the clock with the sole mission to deliver a world-class adult-content platform.

RESPECT

Respect for community members, content creators, and service providers is paramount. CUMINU considers every single person a crucial part of the development of the project. We run the majority of our decisions by the community and we take feedback very seriously.

INNOVATION

We believe that to deliver a truly innovative product, we must deliver consistent progress and results. We do not create a game-changing product overnight. It is done through an enormous amount of grit and determination by both our community of CUMINU investors and the development team. We plan to disrupt the industry by creating a platform that rethinks every detail of typical adult-content transactions. We do not do this in a vacuum. Communication with creators and consumers have been an essential part of our development process. By identifying existing challenges, we can build a revolutionary solution.

3 TOKENOMICS

CUMINU is an ERC-20 token that was created on the Ethereum blockchain on May 12 2021. The CUMINU-ETH pair was launched on Uniswap, one of the largest decentralized cryptocurrency exchanges in the world.

TOTAL SUPPLY

10 BILLION TOKENS

ADDED TO LIQUIDITY POOL

90% OF ALL TOKENS

LOCKED FOR TWO (2) YEARS

LIQUIDITY POOL

4 ECOSYSTEM

CUMINU TOKEN ERC-20

CUMINU is the parent token of the project. Investors looking to invest in the platform's enormous potential for growth should consider buying CUMINU. Earnings from the **cummuniti** platform contribute directly in the reduction of the supply of CUMINU token. This will resemble stock buybacks. In effect, CUMINU will be deflationary.

cummuniti PLATFORM POWERED BY CUMINU TOKEN

The first version of the **cummuniti** platform has gone through multiple rounds of successful tests. The second version of the platform, codenamed "V2," is currently under construction with highly experienced developers.

We collect 10% of all tips paid out to content creators on the **cummuniti** platform. These will be added to a pool, which will be used in a series of automatic buys of CUMINU token to be permanently destroyed. The CUMINU smart contract allows tokens to be removed entirely from the total supply, without the need to send any tokens to a "dead wallet."

TIPINU TOKEN BEP-20

We will be creating a “utility token” on the Binance Smart Chain to be used as a currency on the platform. CUMINU token will not be used as a tipping currency, although holders with certain amounts of CUMINU will be eligible for exclusive benefits. The tipping currency, named TIPINU, will act as a stable currency with a liquidity pool of \$10 million. This will protect TIPINU from high levels of price fluctuations. A 5% transaction fee will be built into all transactions of TIPINU. This will go directly to the CUMINU buyback pool.

5 UTILITY

ETHEREUM BLOCKCHAIN

The Ethereum Blockchain is arguably the most established smart-contract blockchain in the cryptocurrency space. Ethereum was a natural choice for CUMINU as it provides a level of reliability that the development team was comfortable with. Yet, before Ethereum 2.0 is released, the Proof-of-Work consensus mechanism remains expensive, slow, and unviable for a currency that requires high transaction speeds.

ERC-20

TIPINU was created with speed in mind. At the moment, the Binance Smart Chain (BSC) will be able to support the requirements of micro-transactions on the **cummuniti** platform. The development team is constantly looking for better alternatives to improve our infrastructure. As blockchain technology improves, we will consider better alternatives. Possible candidates being discussed are Cardano, Solana, ETH 2.0, as well as Algorand.

BEP-20

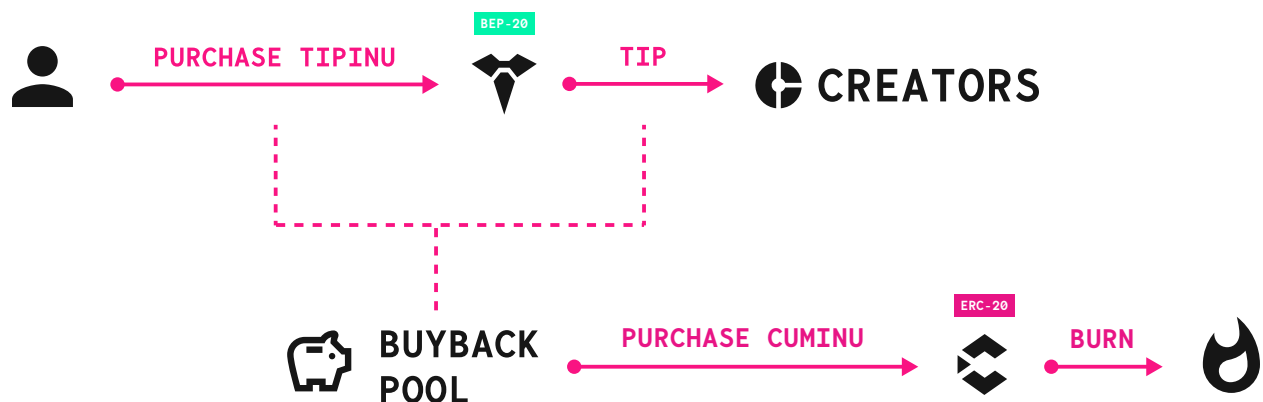

CROSS-CHAIN BURN MECHANISM

The burn mechanism of CUMINU relies on the entire **cummuniti** ecosystem. Here's how a **cummuniti** user will benefit from the reduction in supply of CUMINU.

To participate on the CUMINU platform, users will have to connect their cryptocurrency wallets. They could then make a purchase of TIPINU from either the on-site swap, or directly from PancakeSwap. A modest fee of 5% will be collected from each purchase of TIPINU. The fee will then be sent to a buyback pool.

All transactions on the platform will be conducted in TIPINU. Users will have to pay content creators with TIPINU for products or services. 10% of TIPINU will be taxed automatically from the revenue of content creators and sent to the same buyback pool.

All TIPINU accrued in the buyback pool will then be used to buy CUMINU from the open market to be permanently burned.

6 ROADMAP

CUMINU token has already achieved remarkable success and it is still only getting started. Within 90 days of the token launch, CUMINU has built and launched a working streaming site that became a proof-of-concept for the **cummuniti** platform.

Following the successful launch of the proof-of-concept, we have assembled a highly talented development team that is working round the clock to ensure the vision of the project gets executed to perfection.

Q2 2021

ETH CONTRACT CREATED
ADDED LOCKED LIQUIDITY
PAIR ON UNISWAP
WEBSITE LAUNCH
SOCIALS & BRANDING
CMC/CG LISTING
1500 CUMINU HOLDERS
\$10M CUMINU VALUATION

Q3 2021

7 HOW TO BUY

STEP 1 CREATE A CRYPTO WALLET

WE RECOMMEND METAMASK AND TRUST WALLET

You can access these wallets through your mobile app stores. Just download the Trust Wallet or MetaMask apps to begin.

You can also use MetaMask through a browser extension. Visit **metamask.io/download** to install.

You will be given a Seed Phrase when you set up your crypto wallet for the first time. Please write that down on a piece of paper rather than save it digitally.

STEP 2 SEND ETH TO YOUR WALLET

ETH IS THE CURRENCY OF THE ETHEREUM BLOCKCHAIN

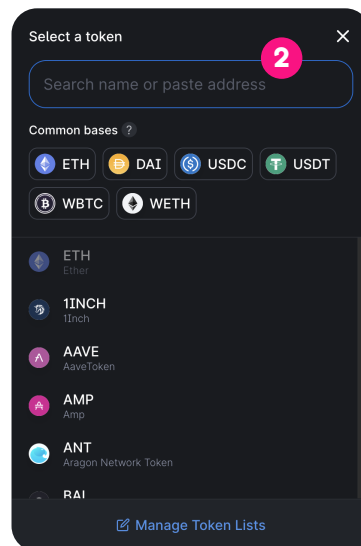

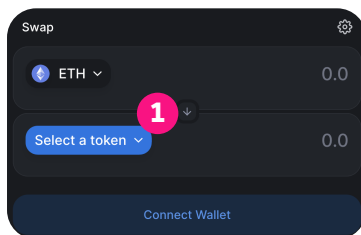

ETH is required to buy CUMINU. Once you have set up your wallet, send the ETH you have bought through a cryptocurrency exchange (CEX) to your wallet.

STEP 3 VISIT UNISWAP

UNISWAP IS ONE OF THE LARGEST DECENTRALIZED EXCHANGES (DEX) FOR CRYPTOCURRENCIES

Visit app.uniswap.org

Connect your wallet to begin swapping. Set your slippage to 1% and buy small chunks to avoid front-running bots.

1 Click on **Select a Token**

2 Enter “CUMINU” into the search field.

3 Enter the amount of ETH or CUMINU and click Swap.
